INTRODUCTION

This report presents a history of grazing on BLM lands Within Grazing Districts administered under Section 3 of the Taylor Grazing Act.

The tables and charts were compiled from data published in *Public Land Statistics* and its predecessors for the period 1947 through 1993.

There were several changes in reporting formats, procedures, policies, and regulations during that period of nearly five decades. Therefore, the information presented in this report should be regarded as approximations rather than firm statistics.

The figures shown in the columns for "Operators", "Authorized AUMs", "Acres", and "Preference AUMs" are transcribed directly from *Public Land Statistics* except as follows:

- "Operator" refers to operator or permit. While not identical, numbers of operators and numbers of permits are similar. Variation in published reports made it impossible to use just operators or just permits for the entire period of record.
- There were a few instances where it was very obvious that the published numbers were a gross reporting error. Estimates were used in these situations and are shaded gray in the tables. Estimates were derived by averaging the previous reporting year with the following reporting year.
- "Preference AUMs" were not published before 1985. For the period of 1962 through 1984, preference was estimated by adding published figures for authorized non-use to the published figures for total authorized use.

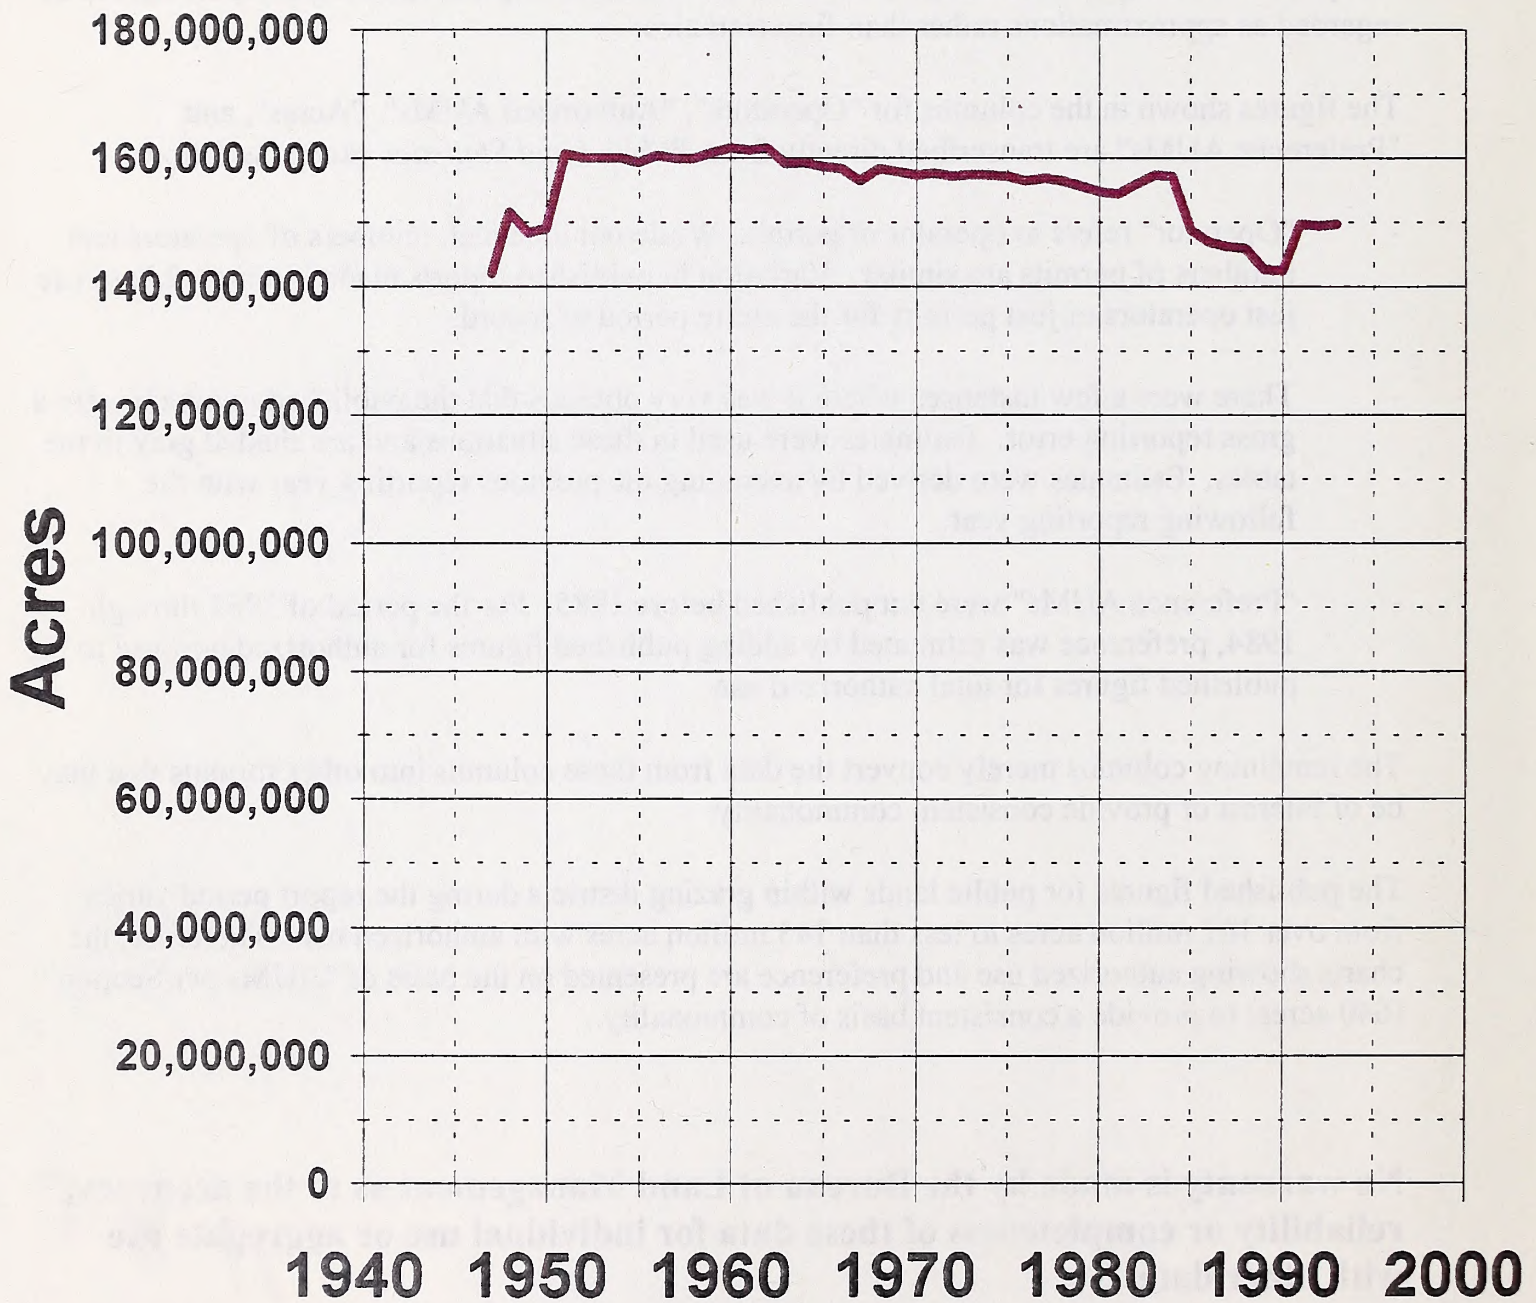

The remaining columns merely convert the data from these columns into other formats that may be of interest or provide consistent commonality.

The published figures for public lands within grazing districts during the report period varies from over 161 million acres to less than 143 million acres with authorized use. Therefore, the charts showing authorized use and preference are presented on the basis of "AUMs per Section" (640 acres) to provide a consistent basis of commonality.

No warranty is made by the Bureau of Land Management as to the accuracy, reliability or completeness of these data for individual use or aggregate use with other data.
